

Method 1: Using the Official Font Awesome Website

Font Awesome is a popular icon library that provides thousands of free icons for web development. To use Font Awesome icons, you need to include its library in your HTML file.

Step 1: Open the Official Website

Open your web browser and visit the official Font Awesome website:

<https://fontawesome.com>

Step 2: Create a Free Account

1. Click the **Start for Free** or **Get Started** button.
 2. Sign up using your email address or another supported login method.
 3. Verify your account if required.
-

Step 3: Generate Your Font Awesome Kit

After signing in:

1. Go to the **Kits** section.
2. Click **Create a New Kit** (if one is not already available).
3. Font Awesome will automatically generate a unique Kit for your account.

Example:

```
```html id="up08e8" <script src="https://kit.fontawesome.com/YOUR_KIT_ID.js"
crossorigin="anonymous"></script>
```

```
> Note: `YOUR_KIT_ID` is a unique identifier generated specifically for
your Font Awesome account.
```

```

```

```
Step 4: Copy the Kit Code
```

Copy the generated ``<script>`` tag from your Font Awesome dashboard.

Example:

```
```html id="kkxw72"
```

```
<script src="https://kit.fontawesome.com/YOUR_KIT_ID.js"
crossorigin="anonymous"></script>
```

Step 5: Paste the Kit Code into Your HTML File

Paste the copied `<script>` tag inside the `<head>` section of your HTML document.

Example

```
```html id="3v1x3d" <!DOCTYPE html> <html>
```

```
<head>
```

```
<title>Font Awesome Example</title>
```

```
<script src="https://kit.fontawesome.com/YOUR_KIT_ID.js"
crossorigin="anonymous"></script>
```

```
</head>
```

```
<body>
```

```
<h2>My Website</h2>
```

```
</body>
```

```
</html>
```

```

```

### ## Step 6: Use Font Awesome Icons

After adding the Kit, you can use any Font Awesome icon by adding its class name inside an `<i>` tag.

#### ### Example

```
```html id="u5ewvc"
```

```
<i class="fa-solid fa-house"></i>
```

```
<i class="fa-solid fa-user"></i>
```

```
<i class="fa-solid fa-phone"></i>
```

```
<i class="fa-solid fa-envelope"></i>
```

Output

 Home Icon

 User Icon

 Phone Icon

 Email Icon

Summary

Step	Description
Step 1	Open the official Font Awesome website.
Step 2	Create a free Font Awesome account.
Step 3	Generate a new Font Awesome Kit.
Step 4	Copy the generated <code><script></code> tag.
Step 5	Paste the script inside the <code><head></code> section of your HTML file.
Step 6	Use icons with the <code><i></code> tag and the appropriate Font Awesome classes.
