

Practical: Create an Amazon-Style Navigation Bar Using HTML and CSS

Problem Statement

Design an **Amazon-style navigation bar** using **HTML and CSS**. The navigation bar should contain:

- Amazon logo (text)
- Search box
- Navigation links
- Sign In button

The navigation bar should be displayed in a single row with a dark background.

Algorithm

Step 1: Create an HTML document.

Step 2: Create a `<div>` with the class name `navbar`.

Step 3: Add the website logo using the `<h2>` tag.

Step 4: Add a search box using the `<input>` tag.

Step 5: Add navigation links using the `<a>` tag.

Step 6: Add a **Sign In** button.

Step 7: Apply CSS styles to create an Amazon-like appearance.

Program

```
```html id="uz2zv2" <!DOCTYPE html> <html>
```

```
<head>
```

```
<title>Amazon Navbar</title>
```

```
<style>
```

```
body{ margin:0; font-family:Arial, sans-serif; }
```

```
.navbar{ background:#131921; display:flex; align-items:center; justify-content:space-between; padding:12px 20px; }
```

```

.logo{ color:#ff9900; font-size:28px; font-weight:bold; }

.search{ width:350px; padding:8px; border:none; border-radius:4px; }

.menu a{ color:white; text-decoration:none; margin:0 12px; }

.btn{ background:#febd69; color:black; padding:8px 15px; border-radius:4px; text-decoration:none;
font-weight:bold; }

</style>

</head>

<body>

<div class="navbar">

<div class="logo"> Amazon </div>

<input type="text" class="search" placeholder="Search Products">

<div class="menu">

Home

Today's Deals

Orders

Cart

Sign In

</div>

</div>

</body>

</html>

```

```

```

```
Output
```

```
```text id="l2ad8u"
```

```
+-----
```

```
+
```

| Amazon | [Search Products_____] | Home Deals Orders
Cart Sign In|

+-----
+

HTML Tags Used

Tag	Purpose
<code><div></code>	Creates sections of the navigation bar
<code><h2></code>	Displays the website logo/title
<code><input></code>	Creates the search box
<code><a></code>	Creates navigation links
<code><body></code>	Displays the webpage content

CSS Properties Used

Property	Purpose
<code>display:flex</code>	Places all navbar items in one row
<code>justify-content:space-between</code>	Adds space between sections
<code>align-items:center</code>	Vertically aligns items
<code>background</code>	Sets the navbar background color
<code>padding</code>	Adds space inside the navbar
<code>border-radius</code>	Rounds the corners of the search box and button
<code>text-decoration:none</code>	Removes the underline from links
<code>color</code>	Changes the text color
<code>font-size</code>	Changes the text size

Learning Outcome

After completing this practical, students will be able to:

- Create an Amazon-style navigation bar.
- Use **Flexbox** to align elements in a single row.
- Add a search box and navigation links.
- Style buttons, links, and backgrounds using CSS.

- Design a simple, professional website header.
