

Practical: Create a Book Details Page Using CSS Flexbox

Problem Statement

Design a **Book Details Page** similar to an online shopping website (Amazon). The webpage should display the **book image on the left** and the **book details on the right** using **CSS Flexbox**.

The page should contain:

- Book Cover Image
 - Book Title
 - Author Name
 - Book Description
 - Read More Button
-

Aim

To create a professional **Book Details Page** using **HTML, CSS, and Flexbox**.

Algorithm

Step 1: Create an HTML document.

Step 2: Create a parent <div> with the class name container.

Step 3: Create two child <div> elements:

- Left Section
- Right Section

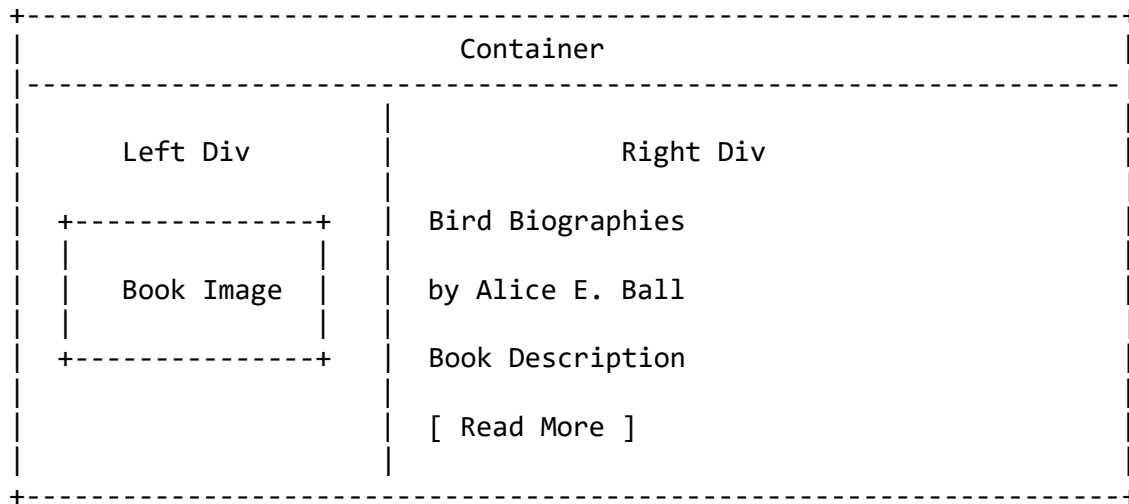

Step 4: Place the book image inside the **Left Section**.

Step 5: Place the title, author, description, and button inside the **Right Section**.

Step 6: Apply CSS Flexbox using `display: flex`.

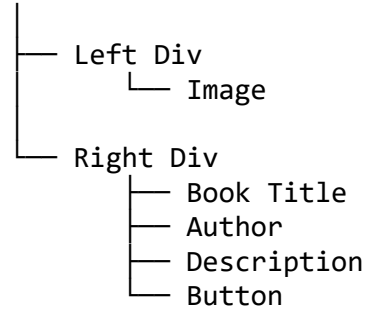

Step 7: Save the file and run it in a browser.

Layout Diagram

HTML Structure

Container

HTML Program

```
<!DOCTYPE html>
<html>

<head>

<title>Book Details</title>

<link rel="stylesheet" href="style.css">

</head>

<body>
```

```
<div class="container">

  <div class="left">

  </div>

  <div class="right">

    <h1>Bird Biographies</h1>

    <h3>by Alice E. Ball</h3>

    <p>

      Bird Biographies introduces readers to different
      species of birds and their natural habitats.

    </p>

    <a href="#" class="btn">

      Read More

    </a>

  </div>

</div>

</body>

</html>
```

CSS Program

```
body{

  font-family:Arial, sans-serif;

  background:#f5f5f5;

  margin:30px;
```

```
}  
  
.container{  
  display:flex;  
  gap:40px;  
  background:white;  
  padding:20px;  
  border:1px solid lightgray;  
}  
  
.left{  
  width:280px;  
}  
  
.left img{  
  width:100%;  
}  
  
.right{  
  flex:1;  
}  
  
.right h1{  
  font-size:40px;  
}  
  
.right h3{  
  color:blue;  
}  
  
.right p{
```

```
line-height:28px;

text-align:justify;

}

.btn{

background:orange;

color:white;

padding:10px 20px;

text-decoration:none;

border-radius:5px;

}
```

Output

Image	Bird Biographies by Alice E. Ball Description about the book...
-------	---

[Read More]

HTML Tags Used

Tag	Purpose
<div>	Creates the container and sections
	Displays the book image
<h1>	Displays the book title
<h3>	Displays the author name
<p>	Displays the description
<a>	Creates the Read More button

CSS Properties Used

Property	Purpose
display:flex	Displays the left and right sections side by side
gap	Adds space between the two sections
width	Sets the width of the image section
flex:1	Allows the right section to occupy the remaining space
padding	Adds space inside the container
background	Sets the background color
border	Adds a border around the container
line-height	Improves readability of the description
text-decoration	Removes the underline from the button
border-radius	Rounds the button corners

Learning Outcome

After completing this practical, students will be able to:

- Create a two-column webpage using **CSS Flexbox**.
- Arrange content using parent and child <div> elements.
- Display an image and text side by side.
- Design a professional book details page similar to Amazon.
- Apply Flexbox properties such as `display: flex`, `gap`, and `flex`.
